Attention: Examiner David Wu

COMMUNICATION

Sir:

Thank you for your assistance in the examination of this patent application. Pursuant to our telephone conversations of this morning and yesterday during which you presented me with a restriction requirement, I wish to formally acknowledge my election to prosecute the claims relating to the process for polymerization. I am enclosing proposed additional claims for this application. These claims are additional polymerization process claims; all of which fall within the scope of Claim 18 as submitted in the Preliminary Amendment of July 11, 1991.

Upon review of these claims I am sure you will find that the claims introduce no new matter and raise no new issues for which any further search and examination will be required. Support for amendments 25-32 is found in the as filed specification of the application at page 16, line 3. Support for amendment 33 is found on page 42 at line 11.

I look forward to speaking with you later today. At that time I am hopeful that this application will be ready for allowance. Should any further fees be required, you are authorized to charge deposit account 05-1710 as needed.

Sincerely,

Evan Butts
